About

Product-focused engineer passionate about solving customer problems through thoughtful innovation. Skilled at coordinating cross-functional teams, translating customer needs into product strategy, and building collaborative environments where teams thrive. Founder of shipped iOS product with end-to-end ownership (product discovery, design, monetization, analytics). Multilingual (FR/EN/ES/PT) with expertise in cybersecurity, digital transformation, and customer-centric problem-solving.

Work experience

● Cybersecurity Governance & Customer Success

From 2024 to 2025 La Banque Postale Paris, France

- Accelerated adoption of internal tools by understanding user needs, translating technical requirements into business language, and collaborating with stakeholders; increased adoption by 40%
- Coordinated alignment between IT and business teams on security governance; facilitated cross-functional communication to ensure shared understanding of objectives
- Contributed to executive-level reporting; ensured that security insights were clear, actionable, and informed board-level decision-making

● Application Development Analyst

From 2022 to 2024 Accenture Paris, France

- Partnered with Fortune 500 clients on digital transformation initiatives; deeply understood customer pain points and translated them into technical solutions
- Created a bridge between engineering and business stakeholders by communicating technical concepts to non-technical audiences; ensured alignment on priorities and realistic expectations
- Identified technical capability gaps within teams; collaborated to design solutions matching business needs and innovation aspirations
- Supported change management and team coordination; helped cross-functional groups work together effectively during transformation

Analysis

Work experience

● Business Analyst (Purchasing & Sales)

From 2021 to 2022 Faurecia Nanterre, France

- Improved CRM and SRM workflows by collaborating with procurement and sales teams; increased visibility and decision-making accuracy across supplier and client networks
- Used KPI reporting and data analysis to inform strategic business decisions; identified improvement opportunities through insights
- Facilitated smooth system transitions through data migration support and user training; ensured stakeholder adoption

Education

● Master of Computer Science Engineering

Since 2019 EPITA Paris, France

Specialized in Cybersecurity, Systems, and Software Engineering, completing practical projects throughout the course.

Developed analytical, creative, and leadership skills during my studies.

Projects & shipped products

Fran's Guide (iOS App) · Fran's Guide (iOS App) (2026)

Designed and launched iOS app solving a real customer pain point: 24/7 AI-powered travel guidance for explorers. Owned full product lifecycle from customer research & discovery through feature prioritization, technical architecture, App Store distribution, and user analytics. Validated product-market fit through direct customer interviews and B2B partnership exploration while tracking acquisition, engagement, and monetization metrics. Integrated AI assistant into product experience, learning to balance technology capability with user needs and business viability.

SeanceNote · App (2026)

Built privacy-focused note-taking app for meeting documentation designed with local-first architecture and industry-specific templates. Features customizable templates tailored to different professions and workflows, demonstrating product thinking around user needs and privacy concerns. Shows ability to identify and solve problems for specific user segments.

Portfolio Website · francoislapetite.com (2024)

Designed and built personal portfolio using React, prioritizing user experience, aesthetic design, and authentic storytelling. Showcased technical creativity through interactive design and refined visual branding aligned with premium digital standards, demonstrating design sensibility and technical execution.

Cloud Infrastructure Deployment with Terraform & Outscale · Cloud-Outscale (2024)

Designed and deployed scalable cloud infrastructure using Terraform, demonstrating infrastructure-as-code best practices and cloud architecture thinking. Built solutions addressing real infrastructure challenges, showing problem-solving ability and technical depth in DevOps and infrastructure management.
